

Lakebase HLS — Your Quick Start

2x quota 60+ \$5K PG extensions SPIF/acct <10ms response 70-80% cost savings

Lakebase is serverless Postgres on Databricks. Lakehouse data — risk scores, care gaps, operational insights — syncs to apps natively. No pipelines. Existing Postgres tools work unchanged.

Open AI Assistant →

Knows all 16 enablement docs. Ask anything in plain English.

Try: "HIPAA script" · "DBA voicemail" · "Aurora vs us" · "pricing objection"

COLD CALL OPENER

⌚ 10 SECONDS

"Hi [Name], this is [You] from Databricks. I work with healthcare teams building patient apps and AI chatbots. Do you have 2 minutes?"

HIPAA — YOU'LL GET ASKED

⌚ 15 SECONDS

"Lakebase runs on Databricks' secure infrastructure — encrypted data, private networking, access controls. HIPAA certification is on the roadmap. Many health systems start with a non-patient-data pilot to prove the fit."

[AE Handoff →](#)

4 PERSONAS — LEAD WITH

Persona	Lead With
IT Leader / CIO	Cost of keeping analytics + apps in sync
DBA / Platform	Ops burden — patching, backups, 3am pages
App Dev / Eng	Pipeline code between Lakehouse and app DBs
Clinical / Biz Ops	Insights stuck in dashboards, not reaching clinicians

HANDOFF QUICK-CHECK

Ready to hand off when:

- ✓ Persona confirmed (DBA, Engineer, or VP)
- ✓ Operational use case identified (not just "interested")
- ✓ Timeline <6 months
- ✓ Budget pathway identified
